E-Tendering System

Introduction to E – Tendering System

E-Tendering means electronic tendering process which is electronically generated by computer under the handling of authorized person. Compared to manual process E-tendering process is very economical, effortless, transparent and very time saver process and it is also secure & accurate.

1.Login page

It is the page from where user can login. It is for authentication purpose. In this page there are two fields, "**User Name**" which is for user name and "**Password**", which is for password of user.

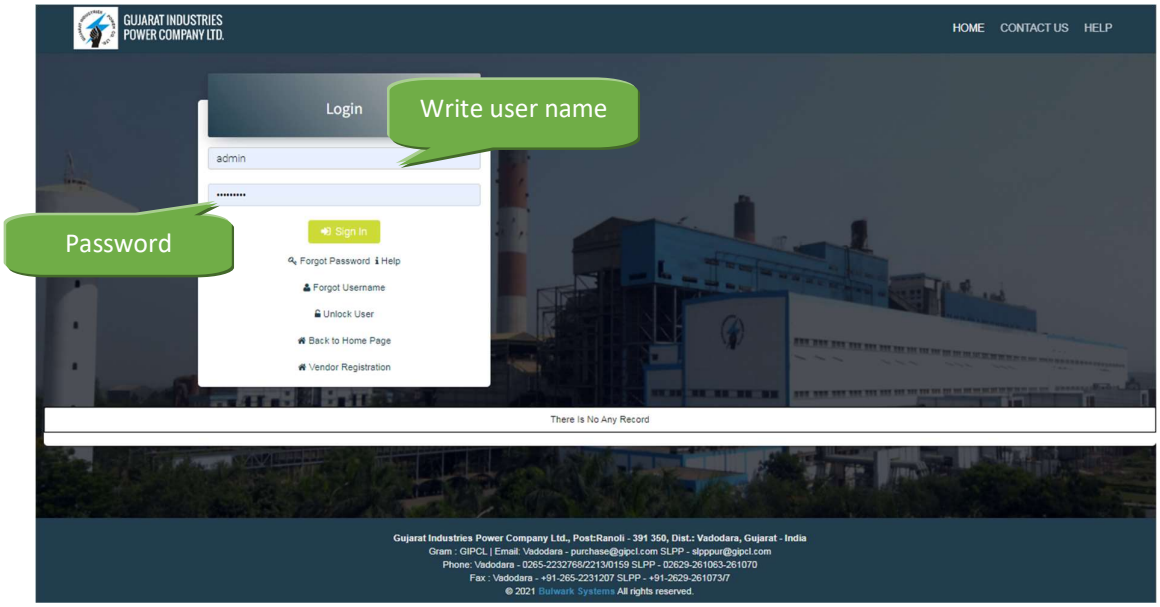

Figure 1: Login Page

For example, to login in admin account enter in "User ID" field "admin" and in "Password" field "******" (password of admin account) then press "OK" button so, if entered User Id and Password is valid then access their account otherwise error message will generate.

If any user forget "password" then click onto "Forget Password" link for further operation to get it back. If any user forgets "User Name" then clicks onto "Forget User Names" link for further operation to get it back. By clicking onto the "Unlock User" link, user can unlock the any user if rights are given.

(Note: if any user enters wrong user id and/or password five times then that user account is block.)

2.Forget Password

If any user forgets password then that user can get it back by clicking onto the "Forget Password", user will see below screen.

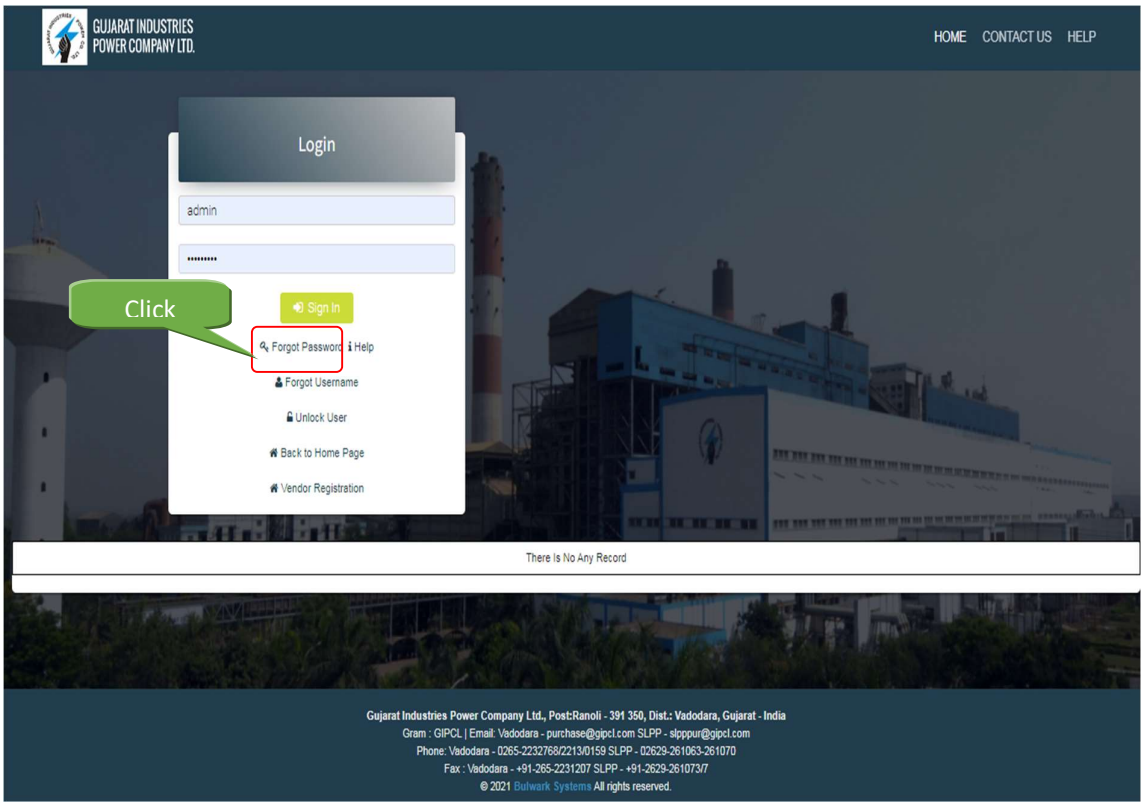

Figure 2: Forget Password

To get the password user should enter User name, Mobile No. or Email ID into textboxes. If entered data are valid then password will sent to user's Email ID.

3.Forget User Name

If any user forgets user name then that user can get it back by clicking onto the "Forget User Name", user will see below screen.

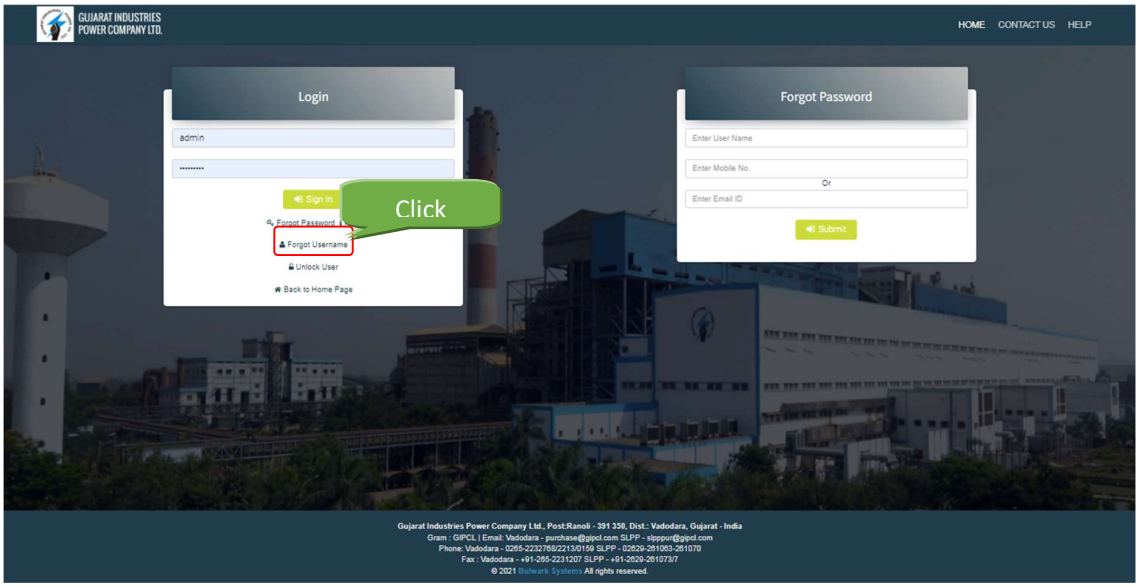

Figure 3: Forget User Name

To get the password user should enter User name, Mobile No. or Email ID into textboxes.

If entered data are valid then password will be sent to user's Email ID.

4. Unlock User

To unlock the User name, user should click onto the "Unlock User", user will see below screen.

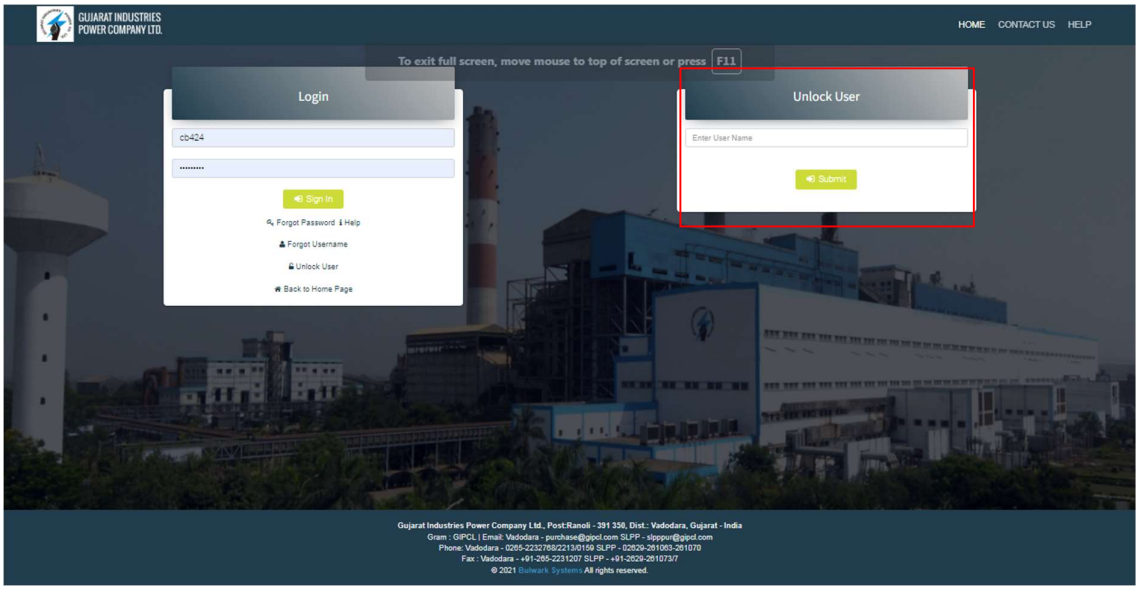

Figure 4: Process Owner Dashboard

Enter user name into textbox whose name is "User Name" and click onto "Ok" button. If user name is valid then it will be Unlocked.
